

WATER SUPPLY DISTRICT OF ACTON (PWS 2002000)

Dear Customer,

The Acton Water District is required to provide you with the included notice about your service line and request that you post it in a visible place in each building you own or deliver it to each consumer. Our most recent inventory has determined that a portion of, or the entire, water pipe (called a service line) that connects your building to the water main is made from galvanized material and may have absorbed lead. This notice includes information about your property's service line, the health effects of lead and how to reduce exposure, as well as information about opportunities to replace service lines.

Please inform Acton Water District once the notice has been posted or delivered, or if you have any questions, by calling Katy Orciuch at (978) 263-9107 or by sending an email to WQ@actonwater.com
